

## Product : Etpol 2002

### INTRODUCTION :

Etpol 2002 is specialized formulated by Inorganic Compound Which Effectively reduce COD from High COD Effluent water.

Etpol 2002 is make insoluble component with Phosphate, sulphate, nitrate sources in effluent water.

### PRODUCT DATA

- |                                     |              |
|-------------------------------------|--------------|
| ● Appearance                        | Clear Liquid |
| ● Use Concentration suggested (g/l) | 5-50 GPL     |
| ● PH                                | 7.5 ± 0.5    |

### MAJOR ADVANTAGES

1. separation of slurry in industrial process
2. Remove COD

### FEATURES

Ready to use liquid.

Easy to prepare solution.

Effective at wide PH range.

Completely miscible with water.
